

Project Presentation

Community-Based Civic Issue Management System

Your Voice. Your Community. Your Change.!!

Presented By:

- 1) Ritesh Ravindra Jadhav,
- 2) Pranav Santosh Kadam

Diploma in Computer Engineering

Third Year – Semester V

Government Polytechnic, Karad

Academic Year: 2026–27

INDUSTRIAL TRAINING

Organisation: Revolution IT Solutions,
Kolhapur

Duration: 12 Weeks

Period: May 2026 – August 2026

Area: Full Stack / Web Development

Major Learning Areas

- Frontend & Responsive Web Development
- ASP.NET Web Forms
- C# Programming
- SQL Server & Database Connectivity
- .NET / .NET Core
- ORM Concepts
- Git & GitHub
- Testing & Debugging

ABOUT REVOLUTION IT SOLUTIONS

- **Established:** 2017
- **Location:** Kolhapur, Maharashtra
- **Industry:** IT & Software Services

Major Services

- Custom Software Development
- Web Application Development
- Website Development
- Mobile Application Development
- Graphic Design
- Digital Marketing
- Domain & Web Hosting

Industry Focus

Software • Web • Mobile • Digital Solutions

IT INDUSTRY WORKFLOW

WHAT WE LEARNED ABOUT IT INDUSTRY

Software development is not only coding — it is solving real-world problems

TECHNOLOGIES & TOOLS

Skills

UI Design • Database • Programming • Debugging • Version Control

Area	Technologies
Frontend	HTML, CSS, JavaScript, Bootstrap
Backend	C#, ASP.NET Web Forms
Framework	.NET / .NET Core
Database	SQL Server
Development	Visual Studio
Version Control	Git & GitHub
Testing	Chrome / Edge

AGILE / ITERATIVE DEVELOPMENT

Practices Learned

- TASK PLANNING
- CONTINUOUS TESTING
- TEAM COLLABORATION
- REQUIREMENT ANALYSIS
- INCREMENTAL DEVELOPMENT
- FEEDBACK-BASED IMPROVEMENT

Development Cycle

Plan → Design → Develop → Test → Review → Improve

PROBLEM IDENTIFICATION

Common Civic Issues:

- Damaged Roads
- Garbage & Sanitation
- Water Supply
- Streetlights
- Drainage
- Public Infrastructure

Existing Challenges:

- Multiple complaint channels
- Difficult to track complaints
- Limited transparency
- Slow follow-up
- No centralised complaint record

Proposed Need

A centralised platform for civic issue reporting and management.

JANVOICE

Community-Based Civic Issue
Management System

Citizen ↔ Community ↔ Officer ↔ Admin

Goal

Make civic issue management more transparent,
organised and accessible.

What JanVoice Provides

- Digital complaint reporting
- Complaint tracking
- Officer assignment
- Status updates
- Community interaction
- Notifications
- Feedback

OBJECTIVES & SCOPE

Citizen

Officer

Admin

OBJECTIVES

- Easy civic issue reporting
- Complaint status tracking
- Efficient complaint management
- Better citizen-authority communication
- Increased transparency
- Centralised data management
- Proper complaint history

SCOPE

Citizen

Report • Track • Comment • Support • Feedback

Officer

View • Manage • Update • Resolve

Admin

Monitor • Assign • Manage • Control

SYSTEM MODULES

JanVoice is divided into role-based modules. The Citizen module focuses on reporting and tracking issues, the Officer module focuses on handling assigned complaints, and the Admin module provides complete system management.

CITIZEN MODULE

- Registration/Login
- User Dashboard
- Report Issue
- My Complaints
- Community Feed
- Notifications
- Feedback

OFFICER MODULE

- Assigned Complaints
- Complaint Details
- Status Updates
- Resolution Management

ADMIN MODULE

- Dashboard
- User Management
- Complaint Management
- Ward & Category Management
- Officer Management
- Notifications

TECHNOLOGY STACK

Technologies were selected based on our industrial training experience and project requirements.

Frontend

HTML • CSS • JavaScript • Bootstrap

Application

ASP.NET Web Forms • C#

Database

Microsoft SQL Server

Development

Visual Studio

Version Control

Git • GitHub

DATABASE DESIGN

Major Entities:

Additional entities:

- Complaint Images
- Comments
- Supports
- Followers
- Notifications
- Status History
- Feedback
- Emergency Contacts

Key Relationship

User → Complaint → Officer → Status History → Feedback

WORKING & KEY FEATURES

HOW JANVOICE WORKS

1. Register / Login
2. Report Civic Issue
3. Complaint Stored
4. Admin / Officer Reviews
5. Complaint Assigned
6. Officer Updates Status
7. Citizen Gets Updates
8. Complaint Resolved
9. Feedback

Key Features

- ◆ Secure Authentication
- ◆ Community Interaction
- ◆ Complaint Reporting
- ◆ Status History
- ◆ Complaint Tracking
- ◆ Feedback
- ◆ Officer Assignment
- ◆ Notifications

LEARNING & OUTCOMES

Outcome

Industrial Training Knowledge → Practical Project

Technical Learning

- ASP.NET & C#
- SQL Server
- Database Design
- JavaScript
- Responsive UI
- Git & GitHub
- Debugging & Testing

Challenges

- Database relationship design
- Authentication & role management
- Frontend–backend integration
- Maintaining consistent UI
- Debugging errors
- Team-based development

CONCLUSION & FUTURE SCOPE

JanVoice provides a centralised platform for civic issue reporting, tracking and management.

What We Achieved

- ✓ Applied industrial training knowledge
- ✓ Developed a role-based system
- ✓ Designed a structured database
- ✓ Implemented complaint management
- ✓ Improved our development & teamwork skills

FUTURE SCOPE

- Mobile Application
- AI-based Complaint Categorisation
- Advanced GIS / Issue Mapping
- SMS / WhatsApp Notifications
- Advanced Analytics
- Government System Integration

JanVoice

Smart Civic Issue Management System

Empowering Citizens to Report, Track and resolve Civic Issue Transparently.
